

RS-232 to RS-232 Optical Isolators

Model 590 Series

Why let ground loops disrupt your asynchronous RS-232 or RS-422/485 communications?

Data Rate Selection

0-19.2 or 0-115.2 kbps

Interface Isolation Options

RS-232 or RS-422/485 interfaces

Choice of Signal Isolation

Various combinations for signal protection

Self-Powered

DC or AC power, depending on model

Many Model Options

Choose from various combinations of signal protection, interfaces, data rates and connectors

The Patton Model 590 Series of RS-232 to RS-232 optical isolators guards your asynchronous equipment from the hazards of ground looping. Plugging directly into your DTE hardware, the Model 590 Series provides 2500V RMS peak DCE/DTE isolation.

Both the Model 590A (19.2 kbps max) and Model 591A (115.2kbps max) isolate 4 lines on the RS-232 interface--two of which are selectable by internal jumpers.

The Model 592 (19.2 kbps max) and Model 594 (115.2kbps max) isolate 7 pre-wired lines on the RS-232 interface.
