Multiport ISDN VoIP IAD with G.SHDSL.bis Interface

SmartNode 4650

The SmartNode 4650, with up to 5 BRI ports and 8 simultaneous voice channels, is the best way to connect ISDN networks to the world of voice over IP. Using integrated G.SHDSL.bis broadband access, it delivers converged voice and data services that exceed ISDN standards.

3/5 Ports BRI ISDN VoIP
3 or 5 ISDN BRI So ports, 4 or 8 low-bandwidth voice or T.38 fax calls. Advanced adaptive traffic management and shaping for maximum voice quality. Voice prioritization and DownStreamQoS™

G.SHDSL.bis Broadband Access
Complete Access Router with integrated G.SHDSL.bis WAN interface. Up to 5.7 Mbps symmetrical throughput, supporting ATM QoS. Supports multiple PVC, VLAN, and DSLAM inter-operability.

Full Telephony Features
SessionRouter™ allows flexible call routing and numbering plan adaptations, CLIP/CLIR, hold, AOC transfer, and much more.

Management & Provisioning
Web-based management, SNMP, command line interface, & auto-provisioning for automated configuration & SW upgrades.

Full VoIP Protocol Support
SIPv2, H.323v4, MGCP/IUA, ISDN, DSS1, QSIG*, T.38, fax and modem bypass, DTMF relay.

Outstanding Interoperability
Interoperable for voice and T.38 fax with leading SIP service providers, soft-switch vendors, and Asterisk™ IP-PBX.

✔ 2-wire G.SHDSL.bis broadband access

✔ 3 or 5 ISDN BRI So ports with integrated life-line failover relay and terminal power

✔ 4 or 8 simultaneous low-bandwidth voice or T.38 fax calls

✔ Triple-play capable with IGMP v2/v3 snooping and proxy

The SmartNode 4650 series is the CPE of choice for business broadband access providers that want to generate new revenue and acquire new customers through voice-over-IP. Part of the proven market-leading SmartNode VoIP product family, the SmartNode 4650 Series features a 3 or 5 BRI/So port configuration to fit the requirements of small and medium enterprises.

In one single box, it combines broadband access and voice-over-IP, and thanks to IGMP v2/v3 proxy functionality it also delivers video. Throughput ranges up to 5.7 Mbps on 2 wires are made possible with G.SHDSL Annex F & G support, and interoperability covers all major G.SHDSL COs. This is triple-play at your fingertips!

The extra BRI port solves many VoIP network integration problems encountered in real-world installations. The port can synchronize the gateway, and it can be used as a local PSTN breakout port for survivability. It can also be used to shorten the time of number portability—accepting incoming calls through the breakout port while making outgoing calls on the cost-saving VoIP network. With the life-line relay, the port even enables integration of an ISDN emergency terminal powered from the public ISDN.
Like every SmartNode, the 4650 Series models are state-of-the-art VoIP gateways with outstanding interoperability for fax (T.38 and G.711 fallback) and voice. SmartNode products provide seamless network integration, continuous trouble-free operation and cost effective deployment to protect your investments for the future.
