SmartNode™ 4960 PRI VoIP IAD

VoIP Carriers & Service Providers

**Deliver Highly Profitable Business Trunking Services
with the Low-Cost, Feature-Rich SmartNode™ 4960**

**With dual gig-Ethernet ports, 4 T1/E1/PRI, and up
to 120 VoIP calls, the low-cost SN4960 delivers
secure, toll-quality, business-class VoIP.**

SmartNode™ VoIP... more than just talk

Make deep cuts in your overall cost-per-subscriber by rolling out VoIP business-trunking services with a low-cost, high-performance CPE. Now, with Patton's **SmartNode™ 4960 PRI VoIP IAD**, you can:

- **Expand market share** by offering reduced rates on converged VoIP, voice & data services.
- **Increase profit margin** by delivering feature-rich, business-class VoIP services.

Shake it up. Patton's latest technology innovation is shaking up the market with prices that fall way below industry benchmarks. It's also the VoIP industry's first name-brand PRI-class CPE with *dual gigabit-Ethernet ports*.

Integrated access. The SN4960 is also available with a built-in

SmartNode™ 4960 Biz-Class Feature Highlights

- 30 to 120 concurrent VoIP or T.38 FAX calls
- 1 or 4 T1/E1/PRI ports
- Integrated G.SHDSL port (optional).
- 2 Gigabit-Ethernet ports
- Voice-over-VPN with IPsec voice encryption

Small to Medium Enterprises Unleash the Power of VoIP with SIPxNANO™ IP-PBX

Now, small to mid-sized businesses can **drive costs to zero** for internal calls. Plus, this

SIPxNANO IP-PBX
supports up to 30
concurrent VoIP calls

powerful, pint-sized PBX packs more calling and management features than a full-sized legacy PBX.

Improve communications for the whole company with such useful features as auto-attendant, hunt group, call-forwarding and many more. Go to patton.com/sipxnano.

Rockin' with CopperLink™ Patton Ethernet Extenders Keep a Celebrity Alive

Down in Memphis, there's a

G.SHDSL.bis modem for easy broadband access at up to 5.7 Mbps.

Send the right signal.

Pick-a-protocol, any protocol... SIP, H.323, MGCP/UIA, G.703/G.704, T1 RBS/CAS, ISDN PRI, DSS-1, NI-2, Q.SIG... SmartNode has them all. With so many signaling options, the world's most interoperable VoIP gateway can connect *any*

phone equipment (POTS, ISDN, SIP) with *any* VoIP network and softswitch. Go to patton.com/sn4960

SmartNode™ 4960 Biz-Class Feature Highlights (continued)

- DownStreamQoS™ for toll-quality voice
- Prioritized traffic scheduling and shaping

SmartNode™ Track Record

- Proven interoperability with all major softswitches. Go to patton.com/technology/vendors.asp
- First-line service delivery in carrier deployments

webcam focused on a late rock star's front lawn. Fans can log on to the celebrity's web site and see what their hero used to see from his bedroom window.

At the home of the rock-music king, CopperLink™ reigns as King of Ethernet Extenders.

But getting those real-time images out to the Internet involved some interesting network-engineering challenges...

"Patton made it easy to connect a remote location to our network, which otherwise would have been difficult and costly."

-Network Administrator

Ripping up the star's bedroom to install CAT5 or fiber-optic cable was completely out of the question. The technical team needed an innovative technology that could reach beyond Ethernet's physical limitations.
