

CopperLink™

Ethernet Over Copper Solutions

Indoor

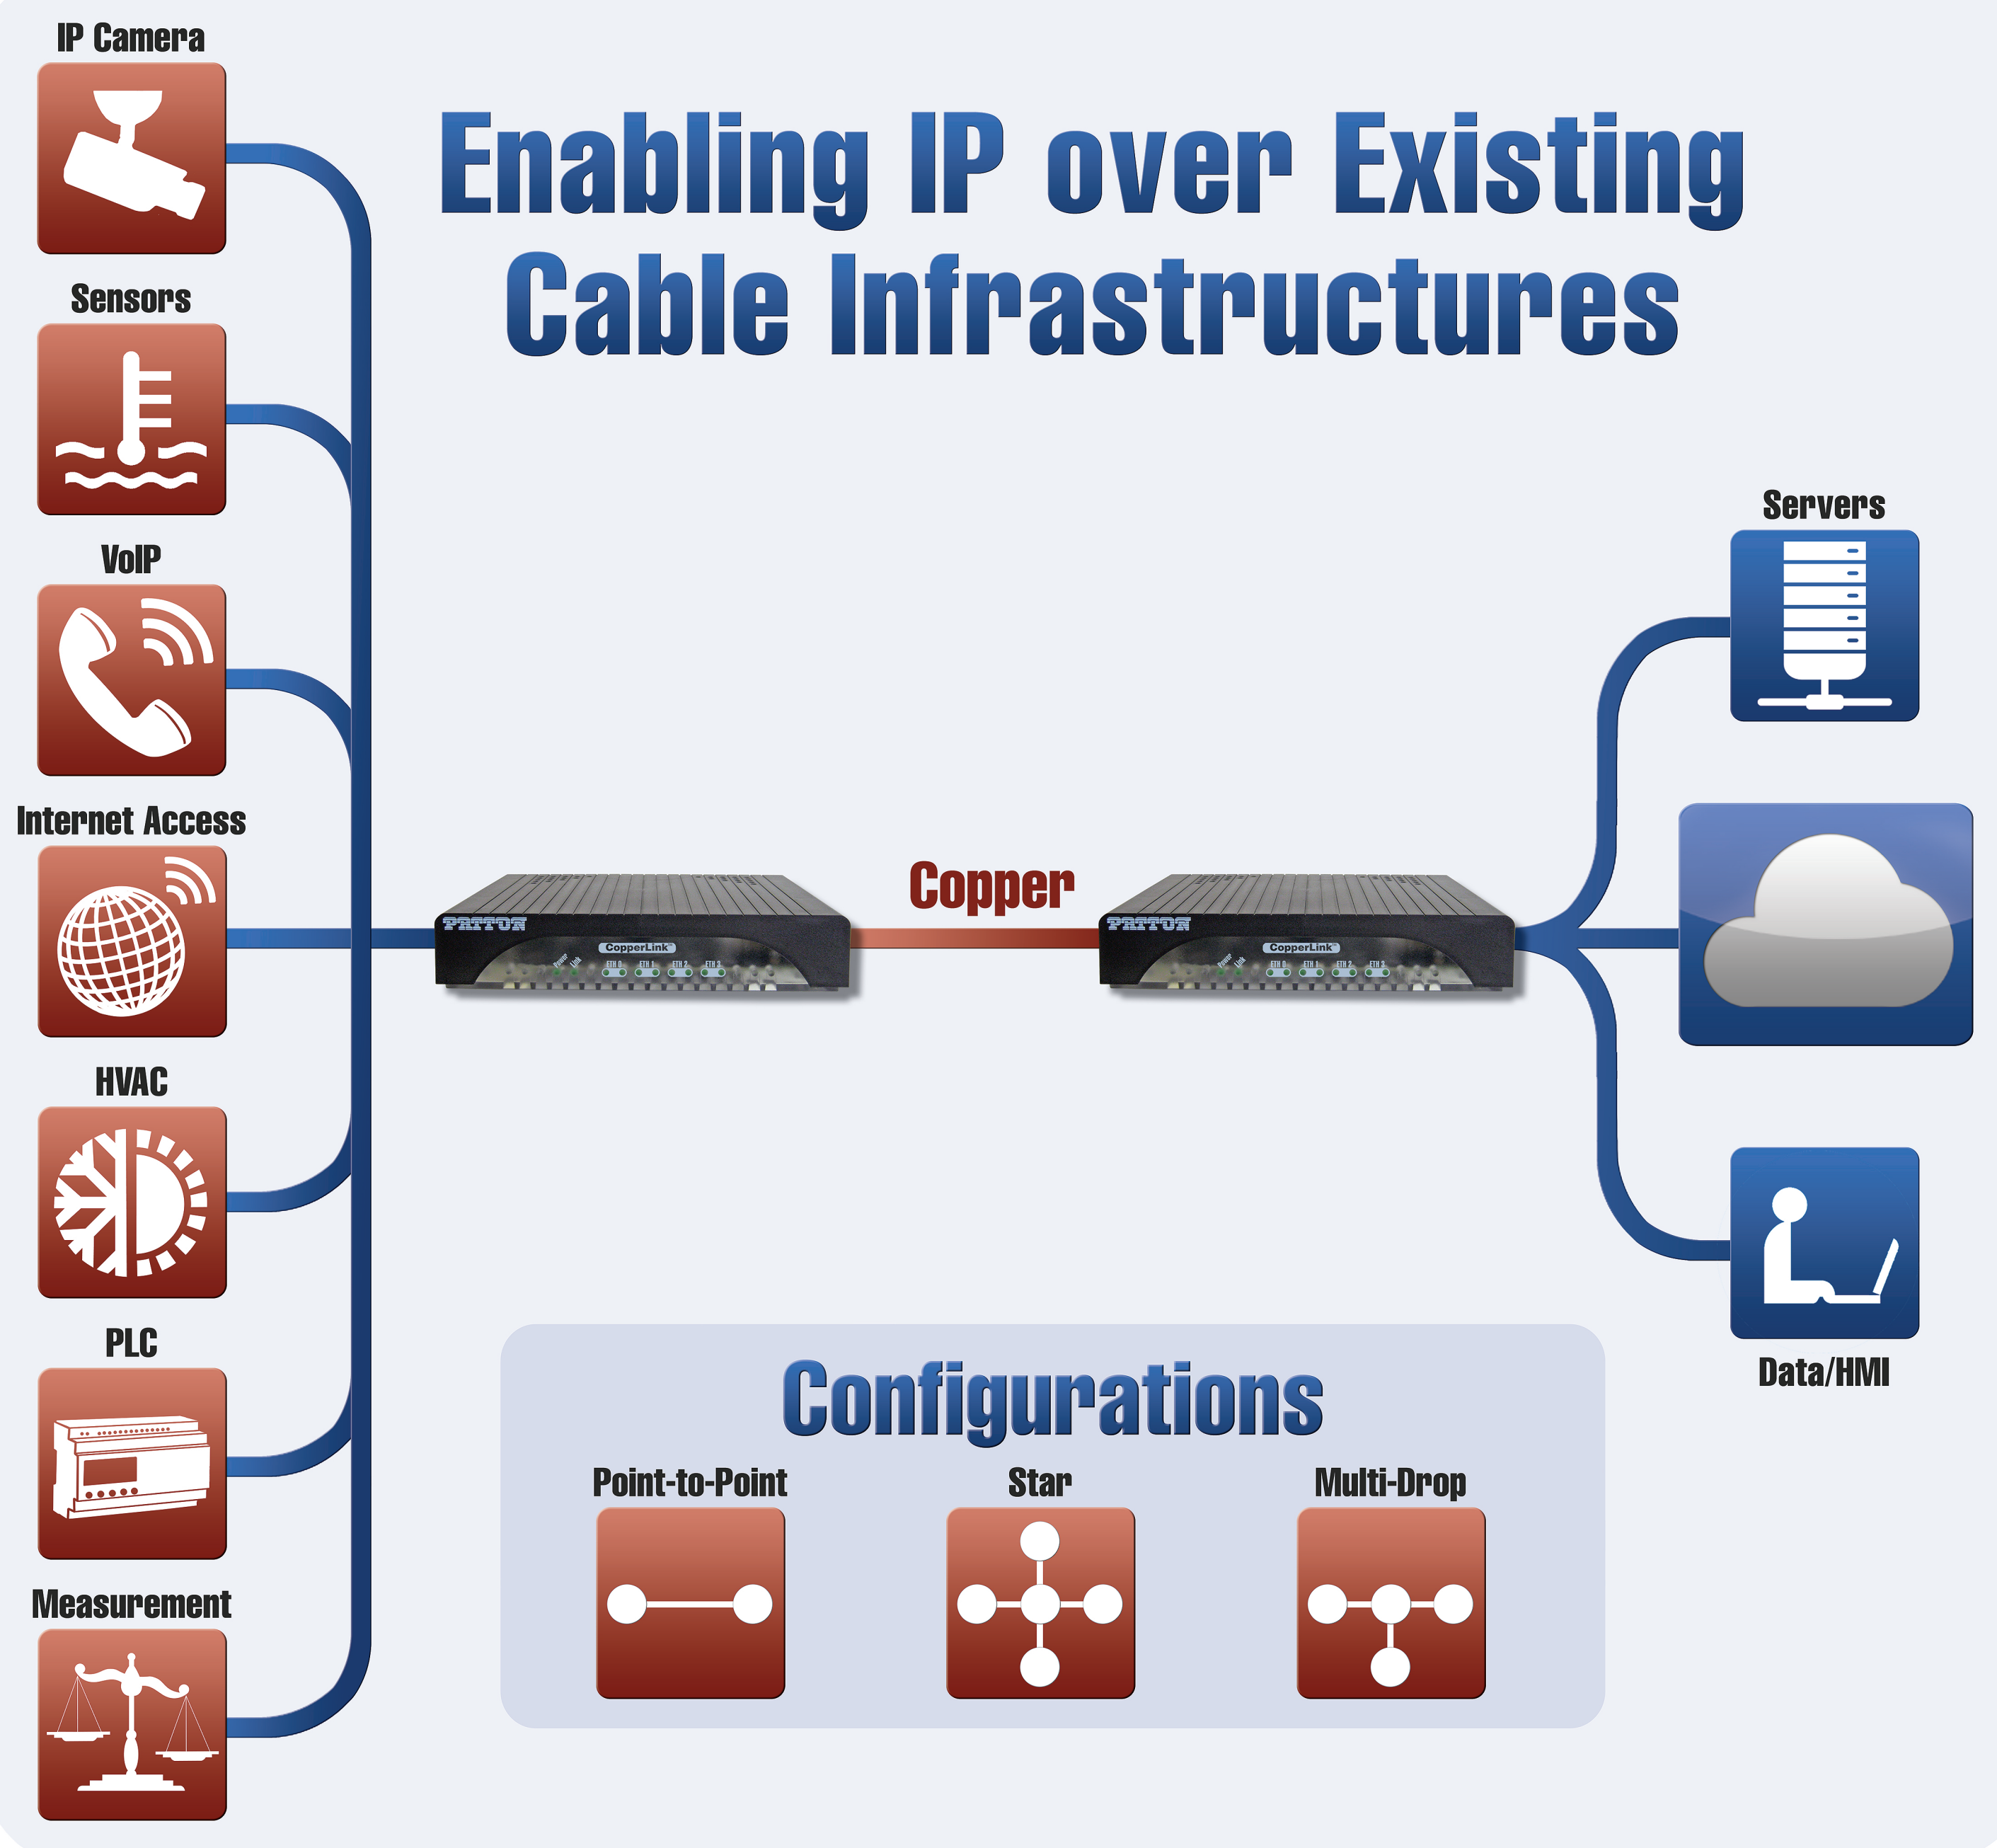

Outdoor

Shop Floor

Enabling IP over Existing Cable Infrastructures

Key Features & Benefits

- Ethernet/network connectivity over existing telephony grade copper
- Extends Ethernet from 328 ft (100 m) to over 5 miles (8 km)
- Connect up to four Ethernet devices over a single twisted pair with no external switch or hub required
- Extended temperature (-40 to 85°C) and element protection available (NEMA, IP, MIL)
