RAS L2TP Release Notes

Patton RAS 3120 / 2960 / 3125RC

Image 3.8.4A

The release image 3.8.4A for the Patton RAS products includes support for Layer 2 Tunneling Protocol (L2TP), Called Party Number (CPN) and Ethernet interface control.

Released Build Numbers

Patton 3120 RAS

Patton 29XX RAS

Patton 3125RC RAS

About this Release

Image 3.8.4a for the Patton RAS product line supports the feature sets for L2TP, CPN and full Ethernet control. The features have been verified with the 3120 and 3125RC Remote Access Servers as well as the 2960 and 2996 models.

New Features

Implemented Features

The following list refers to the new feature capabilities.

L2TP Layer 2 Tunneling Protocol

The L2TP feature supports shared tunnel support, multiple tunnel support and full challenge and channel response requests.

CPN Called Party Number

The CPN feature adds the ability to send Called Party Number information after the establishment of a tcpraw connection.

Ethernet Ethernet 10/100

The ability to set the Ethernet port to 10 half, 10 full, 100 half, 100 full and autonegotiate.
